

## SoftStall™

*For the rest of your horses life!*

SoftStall™ has been coined the 'beauty rest' of the horse world. It provides your horse with a one piece, wall to wall impermeable clean, cozy and relaxing environment that invites them to lay down, rest and rejuvenate their muscles, tendons and legs....which you count on to be in top condition.

Take a closer look at your horses stall; if you were in their shoes would you be happy?

This stall is their home, their comfort zone which should offer them a clean and healthy retreat. The SoftStall™ system invites horses to lay down because it mirrors the benefit of ideal

pastures, where horses are instinctively meant to live. Horses that do not lay down in their stall in some cases find discomfort in the process of lying down or getting up. SoftStall™ eases and eliminates this concern with the reduction of friction and the guarantee of no more hock sores.

Once in place the SoftStall™ System becomes your horses bed, you no longer require the shavings to bed your horse; shavings are simply required to absorb the urine. In turn less shavings and less urine, mean less dust and less ammonia which will greatly improve your horse's respiratory health and cut back on the manure piles.

- Cuts mucking time in half
- Easy to disinfect
- Great for foaling
- Insulates from cold and dampness
- Speeds recovery
- No more hock sores
- Eliminates stall base maintenance
- Pays for itself in a year!

Used and approved by many veterinarians, professionals, trainers and horse owners alike.
